Colloid & Polymer Science

Kolloid-Zeitschrift und Zeitschrift für Polymere
Official Journal of the Kolloid-Gesellschaft
Founded by Wolfgang Ostwald 1907,
continued by F. H. Müller, Marburg 1944–1981
and A. Weiss, Munich 1966–1986

Editors:

Prof. Dr. H.-G. Kilian, Abt. für Experimentelle Physik, Universität Ulm, Oberer Eselsberg, D-7900 Ulm

Prof. Dr. G. Lagaly, Institut für Anorganische Chemie, Universität Kiel, Olshausenstr. 40–60, D-2300 Kiel

Regional Editors:

North and South America: Prof. Dr. E. Matijević, Institute of Colloid and Surface Science, Clarkson University, Potsdam, New York 13676 (USA)

Asia: Prof. Dr. M. Nakagaki, Faculty of Pharmaceutical Sciences, Hoshi University, Ebara 2-4-41, Shinagawa-ku, Tokyo 142 (Japan)

Great Britain: Prof. Dr. R. H. Ottewill, School of Chemistry, University of Bristol, Cantock's Close, Bristol BS8 1TS (England)

Scandinavia: Prof. Dr. B. Lindman, Physical Chemistry 1, Chemical Center, Lund University, P.O.B. 124, S-22100 Lund (Sweden)

Editorial Board:

H. Finkelmann (Freiburg i. Br.)
E. W. Fischer (Mainz)
J. Fuhrmann (Clausthal-Zellerfeld)
H. Hoffmann (Bayreuth)
R. Hosemann (Berlin, West)
G. Kanig (Ludwigshafen)
A. Keller (Bristol)
E. Killmann (Garching)
J. Koppelmann (Leoben)
P. Kratochvíl (Prag)
H. Lange (Düsseldorf)
J. Lyklema (Wageningen)
W. Pechhold (Ulm)
A. Peterlin (Gaithersburg)
H. Ringsdorf (Mainz)
H. Rupprecht (Regensburg)
A. Scheludko (Sofia)
H. W. Spiess (Mainz)
G. R. Strobl (Freiburg i. Br.)
A. Weiss (München)
H. Zahn (Aachen)

Volume 267 (1989)

Contents of Vol. 267 (1989)

Leading Contributions

Gogolewski S: Selected topics in biomedical polyurethanes. A review ... 757

Polymer Science

van Aerle NAJM, Braam AWM: A real-time drawing study on solution-crystallized UHMW-polyethylene – comparison with conventional x-ray results ... 323
Asbach GI, Bodor G, Kilian H-G: Chain-structure-superstructure relations in eutectoid copolymers ... 976
Bakule R, Fähnrich J: Dilatometric study of glass transition in polyisoprene ... 786
Barham PJ, Keller A: On the validity of the Mark-Houwink relationship at very high molecular weights ... 494
Bashir Z, Keller A: Melt drawing as a route to high performance polyethylene ... 116
Billon N, Escleine M, Haudin JM: Isothermal crystallization kinetics in a limited volume. A geometrical approach based on Evans' theory ... 668
Billon N, Haudin JM: Overall crystallization kinetics of thin polymer films. General theoretical approach. I. Volume nucleation 1064
Bodor G, Dalcolmo HJ, Schröter O: Structural and property correlations of ethylene-α-olefin copolymers ... 480
Bohidar HB: Light scattering study of solution properties of bovine serum albumin, insulin, and polystyrene under moderate pressure ... 292
Braun D, Essmail-Pour A, Czerwinski WK: Free radical copolymerization of 1-vinyl naphthalene with styrene, methyl methacrylate, and acrylonitrile ... 1096
ten Brinke G, Grooten R: Enthalpy relaxations in polymer blends and block copolymers: Influence of domain size ... 992
de Candia F, Maglio G, Palumbo R, Sirletti M: Synthesis and physical behavior of polyamide 6, 10-poly(butadiene-co-acrylonitrile) segmented block copolymers ... 9
Dijkstra DJ, Torfs JCM, Pennings AJ: Temperature-dependent fracture mechanisms in ultra-high strength polyethylene fibers 866
Donth E, Michler GH: Discussion of craze formation and growth in amorphous polymers in terms of the multiplicity of glass transition at low temperatures ... 557
Dumitriu S, Popa MI, Haulica I, Cringu A, Stratone A: Bioactive polymers 61. synthesis and characterization of some retard antibiotics ... 595
Ferdinand A: Gas permeability of block copolymers of styrene and butadiene ... 1057
Fiedel HW, Wenig W: Application of interface distribution functions to the evaluation of the small-angle x-ray scattering of multicomponent polymer systems ... 389
Frensch H, Jungnickel B-J: Some novel crystallization kinetic pecularities in finely dispersing polymer blends ... 16
Fujimatsu H, Ogasawara S, Satoh N, Komori K, Kuroiwa S: Adhesive effect of high density polyethylene gels on polyethylene moldings ... 500
Gan LM, Ng SC, Ong SP, Chew CH, Koh LL: A light-scattering study of the influence of poly(ethylene) glycol on the droplet size and the interdroplet interaction in a water-in-oil-microemulsion ... 1087
Godovsky YuK, Bessonova NP, Mironova NN: Thermodynamics of the deformation of segmented polyurethanes with various hard block contents. II. Stress softening and mechanical hysteresis ... 414
Greiner R, Schwarzl FR: Volume relaxation and physical aging of amorphous polymers. I. Theory of volume relaxation after single temperature jumps ... 39
Harland RS, Peppas NA: Solute diffusion in swollen membranes. VII. Diffusion in semicrystalline networks ... 218
Hakert H, Eckert Th, Müller T: Rheological and electron microscopic characterization of aqueous carboxymethyl cellulose gels. Part I: Rheological aging of aqueous gels of carboxymethyl cellulose in the free acid form (HCMC) ... 226
Hotz W, Strobl G: X-ray scattering study of molecular order in a liquid crystal-side group polysiloxane ... 889
Krysztafkiewicz A: Modified silica precipitated in the medium of organic solvents – an active rubber filler ... 399
Kulawik J, Szeglowski Z, Czapla T, Kulawik JP: Determination of glass transition temperature, thermal expansion, and shrinkage of epoxy resins ... 970
Litvinov VM, Whittaker AK, Hagemeyer A, Spiess HW: Molecular motions in poly(diethyl siloxane) studied by solid-state ^{29}Si NMR ... 681
Makarewicz E: The electrophoretic deposition of polyvinyl chloride organosol from organic medium ... 798
Makarewicz E: An attempt to describe-specific interactions of polymer-polymer type in the plastisol dispersions of polyvinyl chloride ... 803
Martinez-Salazar J, Bayer RK, Ezquerra TA, Baltá Calleja FJ: Conductive polyethylene-carbon black composites by elongational-flow injection molding. Part 3. Study of the structure and morphology ... 409
Meller P, Peters R, Ringsdorf H: Microstructure and lateral diffusion in monolayers of polymerizable amphiphiles ... 97
Michler GH: Crazes in amorphous polymers. I. Variety of the structure of crazes and classification of different types of crazes 377
Milczarek, P, Pluta M, Kryszewski M: Morphology influence on the permeation properties of styrene and polystyrene modified polyethylene membranes ... 209

Minkova L, Mihailov M: Kinetics of nonisothermal crystallization and melting of normal high density and ultrahigh molecular weight polyethylene blends ... 577
Miyajima K, Baba T, Nakagaki M: Interaction of polyoxyethylene cholesteryl ethers with liposomal membranes ... 201
Molski A, Nowicki W: A model of flocculation by very-high-molecular-weight polymers ... 506
Mrkvičková L: The properties and behavior of supermolecular formations in aging aqueous poly(vinyl alcohol) solutions ... 28
Mucha M: Thermo-optical analysis as a complementary method in the study of phase transitions of thermotropic liquid crystalline polymer and its blends with polycarbonate ... 876
Müller T, Hakert H, Eckert Th: Rheological and electron microscopic characterization of aqueous carboxymethyl cellulose gels. Part II: Visualization of the gel structure by freeze-fracturing ... 230
Okubo M, Ikegami K, Yamamoto Y: Preparation of micron-size monodisperse polymer microspheres having chloromethyl group ... 193
Okubo M, Yamamoto Y, Kamei S: XPS analysis (ESCA) of the surface composition of poly(styrene/2-hydroxyethyl methacrylate) microspheres produced by emulsifier-free emulsion polymerization ... 861
Ostrowska-Czubenko J: Spectral studies on the structure and monovalent cation binding to poly(1,3-propylene phosphate) – a synthetic analogue of natural teichoic acids ... 957
Öttinger HC: Gaussian approximation for Hookean dumbbells with hydrodynamic interaction: Translational diffusivity ... 1
Petrović ZS, Javni I, Jelcic Z: The effect of segment length and concentration on dielectric properties of polypropyleneoxide-based polyurethanes ... 1077
Polizzi S, Stribeck N, Zachmann HG, Bordeianu R: Morphological changes in SBS block copolymers caused by oil extension as determined by absolute small angle x-ray scattering ... 281
Richtering WH, Schätzler J, Adams J, Burchard W: Solution behavior of two liquid crystalline polymers of different architectures 568
Ruckenstein E: Emulsion pathways to composite polymeric membranes for separation processes ... 792
Sariban A, Binder K: Scattering from concentration fluctuations in polymer blends: A Monte Carlo investigation ... 469
Schlosser E, Schönhals A: Dielectric relaxation in polymer solids. – Part 2. Application of the new model to polyurethane systems ... 133
Schlosser E, Schönhals A: Recent development in dielectric relaxation spectroscopy of polymers ... 963
Schönhals A, Schlosser E: Dielectric relaxation in polymeric solids. – Part 1. A new model for the interpretation of the shape of the dielectric relaxation function ... 125
Schulze GEW, Wilberg H-P: Isothermic spherulitic growth and the shape of grain boundaries and growth fronts ... 108
Shirahama H, Shikuma T, Suzawa T: Participation of electrolyte cations in albumin adsorption onto negatively charged polymer latices ... 587
Spontak RJ: Geometrical constraints on microstructural development in block copolymer ultrathin films ... 808
Stribeck N: An evaluation method for SAXS-patterns of fibrillar two-phase systems containing oriented particles of moderate anisotropy and short range correlation ... 301
Stribeck N, Bösecke P, Polizzi S: SAXS investigation on the influence of oil dilution in morphological changes in a SBS block copolymer during the first draw cycle ... 687
Suresh Mani, Winter HH, Silverstein M, Narkis M: Power law relaxation in an interpenetrating polymer network ... 1002
Suzawa T, Sasaki M, Tamai H, Matsumoto N: Deposition of polymer latices on grafted Nylon 6 fiber ... 34
Tagawa M, Ohmae N, Umeno M, Gotoh K, Yasukawa A, Tagawa M: Contact angle hysteresis in carbon fibers studied by wetting force measurements ... 702
Vallerien SU, Kremer F, Hüser B, Spiess HW: Broadband dielectric spectroscopy on a discotic liquid crystalline polymer ... 583
Vittoria V, Olley RH, Bassett DC: Structural changes in solvent-induced crystallization of quenched isotactic polypropylene 661
Wu JP, White JL, Cakmak M: Fabrication and characterization of orientation in skew stretched polyethylene terephthalate films 881
Yoshida M, Yokota T, Asano M, Kumakura M: Formation of monodisperse poly(1-methacryloxybenzotriazole) particles by radiation-induced dispersion polymerization ... 986
Zhao X, Urano K, Ogasawara S: Adsorption of polyethylene glycol from aqueous solution on montmorillonite clays ... 899
Zrinyi M, Kilian H-G, Horkay F: On the decisive role of finite chain extensibility and global interactions in networks ... 311

Colloid Science

Abe M, Kubota T, Uchiyama H, Ogino K: Solubilization of oleyl alcohol by pure and mixtures of surfactants ... 365
Ali I, Raghavan S, Pritzker M: Stability of chromium dioxide particles in aqueous media ... 255
Alsina MA, Garcia ML, Espina M, Valls O: Lipolysis of didecanoyl-lecithin/triolein mixed monolayers by phospholipase A_2 923
Ansarifar MA, Luckham PF: Viscoelastic properties of polycrylonitrile particles stabilised by a poly-2-vinyl-pyridine/poly *tert* butylstyrene block copolymer ... 736
Appell J, Bassereau P, Marignan J, Porte G: Extreme swelling of a lyotropic lamellar liquid crystal ... 600
Asano H, Aki K, Ueno M: Properties of aqueous solution of sodium glycocholate and a nonionic surfactant, and their mixtures 935
Baltacioğlu H, Balköse D: Diffusion of protons in silica hydrogel ... 460
Binana-Limbele W, Zana R: Electrical conductivity study of the self-association of ionic surfactants in solution in ethyleneglycol, formic acid and formamide ... 440
Bohidar HB: Dynamic light scattering study of heat aggregation of insulin ... 159
Borchard W, Holtus G: Superposition of sedimentation and demixing in a centrifugal field ... 1127

Borsa J, Kálmán F, Rusznák I: Equilibrium sorption of crystal violet by carboxymethylated cellulose with low degree of substitution ... 915
Bouwstra JA, Jousma H, van der Meulen MM, Vijverberg CC, Gooris GS, Spies F, Junginger HE: A structural study of the mesophases of two oxyethylene alkyl ether-decane-water systems, a comparison between technical grade $C_{12}EO_6$ ... 531
Caminati G, Gabrielli G, Puggelli M, Ferroni E: Mixed monolayers of polymethacrylic esters containing aromatic and aliphatic groups ... 237
Coppola L, La Mesa C, Ranieri GA, Terenzi M: Water self-diffusion in micellar solutions and in lyotropic mesophases of the system water/Triton TX-100 ... 86
Das Gupta PK, Moulik SP: Effects of urea and a nonionic surfactant on the micellization and counterion binding properties of cetyltrimethyl ammonium bromide and sodium dodecyl sulfate ... 246
Durchschlag H: Determination of the partial specific volume of conjugated proteins ... 1139
Dynarowicz P: The structure of adsorbed films of some aliphatic compounds at the water/air interface ... 941
Dynarowicz P, Paluch M, Rychlicka J: Surface properties of aqueous solutions of trifluoroacetic and acetic acid mixture ... 451
Ebert G: Symposium on analytical ultracentrifugation ... 1101
Ekwall P: Solutions of alkali soaps and water in fatty acids. XIV. The L_2-phase structure in light of recent experimental investigations ... 607
Esumi K, Sakamoto Y, Meguro K: Characteristics of mixed bilayers of surfactants formed on alumina ... 525
Fruhner H, Kretzschmar G: Effect of pH on the binding of alkyl sulfates to gelatin ... 839
Gauglitz G, Miertschink M, Marx G: Computerized automation of optical systems of the analytical ultracentrifuge ... 1108
Goworek J, Kusak R: Adsorption of polar substances from binary and ternary mixtures on silica gels ... 539
Henry F, Cansell F, Guillaume JL, Pichot C: Study of the polymer latex coalescence by dielectric measurements at microwave frequency – feasibility of the method ... 167
Henry F, Pichot C, Kamel A, El Aasser MS: Dielectric properties of cleaned and monodisperse polystyrene latexes in microwaves ... 48
Hernández J, Estelrich J, Montero MT, Valls O: The action of indomethacin on neutral and positively charged monolayers 622
Hidalgo-Alvarez R, de las Nieves FJ, Van der Linde AJ, Bijsterbosch BH: Conformational changes of polyglutamic acid adsorbed on cationic polystyrene as characterized by microelectrophoresis technique ... 853
Ho CC: Changes in electrokinetic properties of natural rubber latex after surface chemical modifications ... 643
Holba V: Secondary structure of periodic precipitation patterns in gelatin ... 456
Holtus G, Borchard W: Swelling pressure equilibrium of physical networks in the field of an analytical ultracentrifuge ... 1133
van Hunsel J, Joos P: Study of the dynamic interfacial tension at the oil/water interface ... 1026
Ikeda K, Yasuda M, Ishikawa M, Esumi K, Meguro K, Binana-Limbele W, Zana R: Physiochemical properties of α,ω-type bola-form surfactant in aqueous solution. Eicosane-1,20-bis (triethylammonium bromide) ... 825
Imae T: The flexibility of rodlike micelles in aqueous solutions and the crossover concentrations among dilute, semidilute, and concentrated regimes ... 707
Jousma H, Joosten JGH, Gooris GS, Junginger HE: Changes of mesophase structure of BRIJ 96/water mixtures on addition of liquid paraffin ... 353
Juhász AZ: Water vapor adsorption and capillary reactions of silicates ... 1036
Kálmán F, Borsa J, Madarász R, Rusznák I: Iodine sorption, porosity, and wettability of carboxymethylcellulose of low degree of substitution ... 349
Kalus J, Hoffmann H, Ibel K: Small-angle neutron scattering on shear-induced micellar structures ... 818
Karpe P, Ruckenstein E: Role of electrokinetic phenomena in the preparation of supported metal catalysts ... 145
Kiosseoglou V, Theodorakis K, Doxastakis G: The rheology of tomato seed protein isolate films at the corn oilwater interface 834
Klodwig U, Mächtle W: On-line digitalization of Schlieren pictures inside the analytical ultracentrifuge ... 1117
Komori T, Sakamoto R: On Tanaka-Fillmore's kinetics swelling of gels ... 179
Kozarac Z, Dhathathreyan A, Möbius D: Interaction of nitrophenols with lipids at the air/water interface ... 722
Kruse H-H, Beneke K, Lagaly G: Gas adsorption by a crystalline silicic acid ... 844
Lill NA, Rupprecht H: Characterization of *p*-hydroxybenzoic acid methylester physi- and chemi-adsorbates on silica by IR and UV-spectroscopy ... 714
Livsey I, Ottewill RH: A light scattering study of concentrated dispersions in nonaqueous media ... 421
Matsumoto T, Heiuchi T, Horie K: Morphology and viscoelasticity of bilayer aqueous colloids of low-molecular and macromolecular amphiphiles ... 71
Matsumoto T, Ito D, Kohno H: Interaction between amphiphiles and water molecules in concentrated bilayer aqueous colloids 946
Mehrotra KN, Kumar A: Conductivity of alkaline earth metal soaps in methanol ... 80
Mehrotra KN, Upadhyaya SK: Ultrasonic measurements and other allied parameters of praseodymium and neodymium palmitates in mixed organic solvents ... 741
Merkus HG, Mori Y, Scarlett B: Particle size by sedimentation field flow fractionation. Performance and application ... 1102
Miller DJ: Binding of calcium ions to micelles – a metallochromic indicator study ... 929
Molski A: On the collision efficiency approach to flocculation ... 371
Müller HG: Automated determination of particle-size distributions of dispersions by analytical ultracentrifugation ... 1113
Murthy KA, Kaler EW: Lamellar phase in mixtures of low molecular weight alkanols and cetyltrimethylammonium bromide (CTAB) ... 330

Niccolai A, Baglioni P, Dei L, Gabrielli G: Monolayers of 1,2,3-propanetriol esters at the air-water interface: two-dimensional phases and miscibility ... 262
Pathmamanoharan C, Slob C, Lekkerkerker HNW: Preparation of polymethyl-methacrylate latices in non-polar media ... 448
Pelton R, Lawrence D: The influence of surfactants on latex flocculation with poly(diallyldimethyl ammonium chloride) ... 907
Puggelli M, Gabrielli G, Caminati G: Polypeptides mixed monolayers: collapse mechanism ... 65
Reig F, Mestres C, Haro I, Valencia G, Garcia Antón JM, Alsina MA: Mixed monolayers composed of PC/PS/Chol. Interaction with opioid molecules ... 139
Rettig W, Kuschel F: Spreading and compression of *n*-hexadecyl acrylate at liquid-air interface ... 151
Różycka-Roszak B, Walkowiak U, Witek S, Przestalski S: Micelle hydration by ^{1}H-NMR ... 831
Sesta B, La Mesa C: Micellization and surface activity of *n*-alkyldimethylaminopropanesulfonates in aqueous solutions ... 748
Schwuger MJ, Liphard M: Sodium-aluminium-silicates in the washing process. Part X. Cobuilders and optical brighteners 336
Springsteen LL, Matijević E: Preparation and properties of uniform colloidal metal phosphates. IV. Cadmium-, nickel-, and manganese(II)-phosphates ... 1007
Strivens TA: The rheological properties of concentrated cetyltrimethylammonium bromide-salicylic acid solutions in water 269
Tagawa M, Gotoh K, Yokokura M, Syutoh A, Takechi S: Influence of surface properties of particles on their adhesion and removal ... 434
Tanaka K, Takeda T, Nakamura M, Yamamura S, Miyajima K: Interactions of mixed surfactant solution with liposome membrane ... 520
Tombácz E, Balázs J, Lakatos J, Szántó F: Influence of the exchangeable cations on stability and rheological properties of montmorillonite suspensions ... 1016
Tsubokawa N, Maruyama K, Sone Y, Shimomura M: Grafting onto ultrafine ferrite particles: Reaction of isocyanate-capped polypropylene glycol with hydroxyl groups on the surface ... 511
Tsutsumi K, Abe Y: Determination of dispersive and nondispersive components of the surface free energy of glass fibers ... 637
Ward AJI, Rong G, Friberg SE: The lamellar phase of the sodium dodecylsulfate/decanol/toluene/formamide system: NMR and phase studies of solubilization ... 730
Wiśniewski M, Szymanowski J: Polarity and hydrophile-lipophile balance of polydisperse polyoxyethylene 4-alkylphenyl amines as determined by gas chromatography ... 59
Wolff T: Photochemically induced phase transitions in the system cetyltrimethylammonium bromide-water containing *N*-methyl-*N*,*N*-diphenylamine ... 345
Wunderlich AM, Brunn PO: The complex rheological behavior of an aqueous cationic surfactant solution investigated in a Couette-type viscometer ... 627
Wüstneck R, Buder E, Wetzel R, Hermel H: The modification of the triple helical structure of gelatin in aqueous solution. 3. The influence of cationic surfactants ... 429
Wüstneck R, Buder E, Wetzel R, Hermel H: The modification of the triple helical structure of gelatin in aqueous solution. 4. The influence of nonionic surfactants ... 516

Short Communications

Bánhegyi G, La Mantia FP, Karasz FE: Comment on the "dielectric properties of LDPE/Ny6 blends" ... 552
Nonnenmacher TF: On the origin of fractal scaling mechanisms in ion channel gating kinetics ... 753
Spei M, Holzem R: Thermoanalytical determination of the relative helix content of keratins ... 549
Spei M, Holzem R: The helix content of *a*-keratin ... 648
Yamamoto T, Kubota E: Electrically conducting, thermally stable, and mechanically strong CuS-poly(parabanic acid) composite films and their shielding effect of electromagnetic wave ... 546
